

Scribble Partners With Trifacta

scribble Data

 **TRIFACTA®**

Scribble Data is pleased to announce that we have tied up with [Trifacta](#) as a technical partner.

Trifacta, the global leader in data wrangling software, significantly enhances the value of an enterprise's big data by enabling users to easily transform and enrich raw, complex data into clean and structured formats for analysis.

Scribble's rapid data querying platform complements Trifacta's data wrangling abilities, and provides customers with an integrated solution for self-service data preparation, discovery and advanced analytic insight for complex data.

Scribble's ability to automate the data query process, and maintain the lineage of any analytic investigation provides bookends to the deep data wrangling capabilities from Trifacta.

"Our partnership aims to tap into the expanding opportunity of advanced and adhoc analytics, where prepared data provides significantly more value if more questions can be asked of it, and answered in a timely, cost-effective manner," said Dr. Venkata Pingali, CEO of Scribble Data.

"Not only do we expect to cut significant analyst cost, but we expect businesses to be able to ask much richer questions of their data, and get back answers within the window of opportunity, improving both top and bottom lines", said Indrayudh Ghoshal, who co-founded Scribble Data and heads business operations.

Further news about integrated offerings from Scribble and Trifacta will be made available in the near future.
